

Empowering Rural India with AariTech + HealthTech

The Problem

65% of India's population lives in rural

This highlights the significant portion of the population affected by the issues addressed.

Limited access to quality healthcare.

Many rural residents struggle to find adequate medical services.

No reliable crop or soil advice.

Farmers often lack expert guidance for improving their agricultural practices.

Dependence on untrained local

This reliance can lead to the use of substandard products and ineffective treatments.

Our Solution

Product Overview

Touchscreen interface

Soil testing module

Cloud-based record system
+ expert video calls

Health sensors: BP, sugar,
temperature, oximeter

Agri & OTC medicine
vending machine
